

Hearing Voices (Lampitt Papers)

In this delightful novel, both mystery and comedy of manners, A. N. Wilson continues the strange tale of Julian Ramsay, chronicler of that distinguished literary family, the Lampitts. The story opens in the mid-1960s on a note of gruesome drama, as the fabulously wealthy Virgil D. Everett, Jr., is pushed to his death from a Manhattan skyscraper. Does Everetts murder have anything to do with his ownership of the manuscripts known as the Lampitt Papers? Over thirty years later, actor and Lampitt biographer Julian Ramsay finds himself in New York with his One Man Show about James Lampitts life and experiences. Ramsays recollections take us on a fascinating journey back to the late 1960s, encompassing America, England, and Italy at a time of groundbreaking scientific research and intense theological debate. It is a journey that may reveal the secret to Everetts death and, ultimately, the true content of the Lampitt Papers. This witty and insightful drama will enchant readers already familiar with the Lampitt family, and it is a richly rewarding novel in its own right.
