

The Architecture of Symbolic Computers (McGraw-Hill Series in Supercomputing and Parallel Processing)

Focuses on the design and implementation of two classes of non-von Neumann computer architecture: those designed for functional and logical language computing.

The Architecture of Symbolic Computers (McGraw-Hill Series in Supercomputing and Parallel Processing) by Kogge, Peter M. and a great selection of similar The Architecture of Symbolic Computers Symbolic Expressions and Abstract Programs. 41 McGraw-Hill Series in Supercomputing & Parallel Processing. Peter M. Kogge, The Architecture of Symbolic Computers, McGraw-Hill Series in Supercomputing and Parallel Processing, Peter M. Kogge. Des milliers de livres the architecture of symbolic computers mcgraw hill series in supercomputing and parallel processing peter m kogge on amazoncom free The Architecture of Symbolic Computers McGraw-Hill Series in Supercomputing and Parallel Processing [Peter M. Kogge] on . *FREE* shipping on The Architecture of Symbolic Computers (McGraw-Hill Series in Supercomputing and Parallel Processing) Peter M.
