Problem Solving with C++, 4e itself is a revision of one of the leading books for courses introducing programming in C++. The text explains C++ and basic programming techniques in a way suitable for beginning students. This book adapts to the syllabus created by the instructor rather than making you adapt to the book. The order in which the chapters and sections are covered can easily be changed without loss of continuity in reading the text. The main text and the supplement feature Professor Savitchs friendly, motivational writing style and helpful learning aids that have made his books so popular among students and instructors alike.
